## Re: Application for IT Data Engineer (m/w/d) - Ref: Wernsing Food Family

Dear Hiring Team at WFF IT-Service GmbH,

As a Data Engineer with professional experience at Ericsson and current Master's studies in Artificial Intelligence at BTU Cottbus-Senftenberg, I am eager to apply for the IT Data Engineer position. I am highly motivated to join WFF IT-Service to support the Wernsing Food Family with modern, cloud-based data solutions that ensure high-quality IT infrastructure for your food production network.

During my tenure at Ericsson, I specialized in building scalable data pipelines and maintaining robust data architectures. My technical background aligns directly with your focus on the Microsoft ecosystem:

- **ETL & Cloud Infrastructure:** I have extensive experience developing pipelines using Python and SQL. I am deeply familiar with the logic of **Azure Data Factory** and **SQL Server** management, ensuring that data is processed efficiently and remains scalable.
- **DevOps & Automation:** With a strong DevOps mindset, I prioritize the automation of data workflows and documentation, which mirrors your goal of continuously improving and automating your data architecture.
- **Data Quality:** I previously reduced processing times by 90% while implementing validation checks that ensured 99%+ accuracy—skills I intend to apply to your BI solutions to ensure reliable decision-making.

I am particularly attracted to WFF IT-Service because of your commitment to integrating the value chain through innovative IT systems. I appreciate the hybrid working model you offer; being based in Berlin, I am fully prepared and willing to travel to Addrup for the 3-day on-site requirement to collaborate effectively with the team and understand the local infrastructure.

Regarding language, while I am fluent in English, I am currently at an **A2/B1 level in German** and am actively taking intensive courses to reach professional proficiency. I am committed to integrating into your German-speaking environment and contributing to your team's success.

Thank you for your time and for considering my application. I look forward to the possibility of discussing how my data engineering and DevOps background can support the digital growth of the Wernsing Food Family.

Best regards,

Khaleel Ahmad
